

EQUINE ARTHROSCOPY

Curved Hook Knife

Design by Dr. Hans Wilderjans

163-200-20

www.LEIBINGER-MEDICAL.com

Indication:

Chronic tenosynovitis of the digital flexor tendon sheath with thickening and constriction of the palmar annular ligament.

Goal:

Section of a thickened and constricted annular ligament using a tenoscopic approach

This knife is specially designed to facilitate easy cutting of the palmar annular ligament in cases of chronic tenosynovitis of the digital flexor tendon sheath in the horse.

Specifications

- Curved shaft and bigger hook to facilitate good grip and deep cut in thickened ligaments
- New handle will facilitate accurate placement in hand
- Sharp blade ensures easy cutting in firm chronic thickened ligament

Arthroscopy Rongeurs
