

With almost 50.000 implantations worldwide **TTA RAPID** is one of the most attractive TTA techniques on the market. TTA RAPID can not only fix a cranial cruciate ligament rupture but also a simultaneous patella luxation.

RAPID LUXATION is the elegant solution to fix a patella luxation when there is no simultaneous cruciate ligament rupture. Compared to traditional methods it brings a lot of advantages, simplifications and stability.

LeiLOX 1.5/2.0mm is a micro titanium locking system developed especially for small dogs and cats. Its usage is highly flexible and reaches from standard surgeries up to minimal invasive and micro TPLO surgeries.

This course is supported by RITA LEIBINGER.

Location: Tierklinik Posthausen

Rothlaker Straße 1, DE-28870 Posthausen (close to Bremen), Germany

Datum: **June 9th, 2018**, 08:00 – 16:30 h
